1. INTRODUCTION

The WestConnex project has generated controversy since first proposed in 2012. For its part, the NSW Government has advocated the project’s potential economic benefits from reduced congestion and increased freight movements. Alternatively, the project has faced significant criticism, including about its claimed benefits, value for money, and ability to adequately address Sydney’s future transportation issues.¹

While acknowledging these issues, this paper does not attempt to assess them. Rather, it outlines in a timeline format key regulatory and project developments since the project was first announced by Infrastructure NSW in the 2012 State Infrastructure Strategy. The paper also lists legislation relevant to the WestConnex project, as well as funding, administration and costing details. The intention is to update this document to take account of any future developments.

2. PROJECT OVERVIEW

The WestConnex project involves 33 kilometres of upgraded and new motorways linking the M4 and M5 corridors and providing connections to the Sydney CBD and Airport/Port Precinct.²

The project is being delivered in three stages – Stage 1 from Parramatta to the City West Link; Stage 2 is the New M5 East; and Stage 3 from the City West Link to St Peters. Anticipated start dates and deadlines are below:³

- M4 Widening—Construction commenced on 8 March 2015 and be completed in 2017.
- M4 East—Construction is expected to commence in mid-2016 and be completed in 2019.
- The New M5 including the King Georges Road Interchange—Construction is expected to commence in mid-2015 and be completed in 2019.
- M4 - M5 Link—Construction is expected to commence in 2019 and be completed in 2023.

### 3. TIMELINE OF KEY PROJECT AND REGULATORY DEVELOPMENTS

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>September 2011</strong></td>
<td>The <em>Restart NSW Fund Act 2011</em> came into effect to finance the delivery of priority infrastructure projects using funds sourced from asset recycling initiatives, Waratah Bonds, interest income and windfall tax revenues. The Government allocates Restart NSW funding to projects on the advice of Infrastructure NSW (which was established under the <em>Infrastructure NSW Act 2011</em>).</td>
</tr>
<tr>
<td><strong>September 2012</strong></td>
<td>The WestConnex concept was first developed by Infrastructure NSW as part of the <em>State Infrastructure Strategy 2012</em> which identified the expansion and extension of the M4 corridor and expansion of the M5 East as the two highest priorities for enhancing Sydney’s motorway network.</td>
</tr>
<tr>
<td><strong>October 2012</strong></td>
<td>A formal <em>concept paper</em> for WestConnex was prepared and coincided with the release of the <em>State Infrastructure Strategy</em>. The cost of WestConnex was originally estimated at $10 billion, including property acquisition costs. 75% of this cost would be sourced from user charges, with the NSW and Commonwealth Governments providing the remaining $2-3 billion.</td>
</tr>
<tr>
<td><strong>September 2013</strong></td>
<td>The <em>WestConnex Business Case Executive Summary</em> was published which estimated a higher project cost at $11-11.5 billion; with the NSW Government providing $1.8 billion upfront and the Commonwealth Government providing $1.5 billion over 4 years from 2013-14.</td>
</tr>
<tr>
<td><strong>September 2013</strong></td>
<td>The <em>WestConnex Strategic Environmental Review</em> was published which identified environmental benefits as well as key challenges associated with WestConnex and considered how those issues could be avoided, managed and/or mitigated during project development and delivery. This document was designed to provide an overarching discussion of the key issues and to set the scene for subsequent project specific environmental impact assessment and approvals documents.</td>
</tr>
<tr>
<td>Date</td>
<td>Event Description</td>
</tr>
<tr>
<td>------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>September 2013</td>
<td>The <em>State significant infrastructure Application report</em> for the M4 Widening was lodged to support the State significant infrastructure application under section 115X of the NSW <em>Environmental Planning and Assessment Act 1979</em>. It is specifically put forth to assist the formulation of environmental assessment requirements by the former Director-General under section 115Y of the <em>Environmental Planning and Assessment Act 1979</em>.</td>
</tr>
<tr>
<td>October 2013</td>
<td>The NSW Government established the <a href="#">WestConnex Delivery Authority</a> to lead the delivery of the project.</td>
</tr>
<tr>
<td>November 2013</td>
<td><em>Transport Administration (General) Amendment (WestConnex Delivery Authority) Regulation 2013</em> commenced to constitute WestConnex Delivery Authority as a public subsidiary corporation of Roads and Maritime Services and to enable the corporation to exercise certain functions of RMS (primarily under the <em>Roads Act 1993</em>) in relation to the delivery of the WestConnex program of works in Sydney.</td>
</tr>
<tr>
<td>November 2013</td>
<td>The <a href="#">Director General's Environmental Assessment requirements</a> were issued for the M4 Widening.</td>
</tr>
<tr>
<td>November 2013</td>
<td>The <em>State Significant Infrastructure Application Report</em> for the M4 East was lodged.</td>
</tr>
<tr>
<td>January 2014</td>
<td>The original <a href="#">Director General Environmental Assessment requirements</a> were issued for the M4 East component of WestConnex.</td>
</tr>
<tr>
<td>May 2014</td>
<td>The Commonwealth Government confirmed funding in the <a href="#">2014-15 Budget</a> Papers of $1.5 billion for WestConnex and a concessional loan of up to $2 billion to accelerate delivery of Stage 2 by up to 18 months.</td>
</tr>
<tr>
<td>July 2014</td>
<td><a href="#">Public Authorities (Financial Arrangements) Amendment (Sydney Motorway Corporation Pty Ltd) Regulation 2014</a> was passed to include Sydney Motorway Corporation Pty Ltd and its subsidiaries in the definition of controlled entity in the <a href="#">Public Authorities (Financial Arrangements) Act 1987</a>.</td>
</tr>
<tr>
<td>August 2014</td>
<td>The Sydney Motorway Corporation, a State-owned incorporated company, was set up separately to the WestConnex Delivery Authority to organise the financing of WestConnex. This company is governed by a majority independent board of directors that ensures commercially responsible investments. The Treasurer and the Minister for Roads and Freight are the joint shareholders.</td>

</tbody>
</table>
4. THE APPROVALS PROCESS

The three stages of WestConnex – namely the M4 Widening, M4 East and New M5 and the M4-M5 link – are assessed separately as State Significant Infrastructure under Part 5.1 of the Environmental Planning and Assessment Act 1979.

As such, individual Environmental Impact Statements (EIS’s) are to be published for each individual stage. This will be based on the Department of Planning and Environment Secretary’s Environmental Assessment Requirement, which outline the issues that need to be addressed in each EIS.

Each of the EIS’s will outline the key features of the WestConnex projects and assess any potential environmental or social impacts during both construction and
operation. Importantly, each EIS will also outline recommended measures to minimise and manage potential impacts.

During the preparation of the Stage 1 EIS, the proponents of the **M4 Widening** were required to consult with the relevant government authorities, service providers, community groups and affected landowners:

- Local, State and Commonwealth government authorities, including the: Environment Protection Authority; Office of Environment and Heritage (including Heritage Division); The Heritage Council of NSW; Department of Primary Industries; NSW Office of Water; NSW Health; Auburn Council; Holroyd City Council; Parramatta City Council; and Strathfield Council.
- specialist interest groups, including Local Aboriginal Land Councils, Aboriginal stakeholders, and pedestrian and bicycle user groups;
- utilities and service providers;
- the public, including community groups and adjoining and affected landowners

The EIS’s for individual WestConnex project stages are lodged with the NSW Department of Planning and Environment and the public are invited to provide comments and make submissions. The project proponents are then required to respond to these submissions.

The final determination is made by the Minister for Planning and the Environment, which is informed by the Secretary’s final Environmental Assessment Report.

For more detailed information about the State Significant Infrastructure approvals process, see the NSW Department of Planning and Infrastructure [factsheet](#).

### 5. LEGISLATION RELEVANT TO THE WESTCONNEX PROJECT

- **Transport Administration Act 1988**
  - **Transport Administration (General) Regulation 2013**
    - **Transport Administration (General) Amendment (WestConnex Delivery Authority) Regulation 2013** which commenced in November 2013 to constitute WestConnex Delivery Authority as a public subsidiary corporation of Roads and Maritime Services and to enable the corporation to exercise certain functions of RMS
(primarily under the *Roads Act 1993* in relation to the delivery of the WestConnex program of works in Sydney.

- **Environmental Planning and Assessment Act 1979**
  - *Environmental Planning and Assessment Amendment (WestConnex) Order 2014* - The object of this Order is to declare development for the purposes of the following parts of WestConnex to be State significant infrastructure and critical State significant infrastructure.
    - Critical State significant infrastructure are outlined in Schedule 5 of the *State Environmental Planning Policy (State and Regional Development) 2011*.
  - An Environmental Impact Statement must be prepared in accordance with, and meet the minimum requirements of Schedule 2 of the *Environmental Planning and Assessment Regulation 2000*. Other components of the planning approval process under the Regulation are listed below:
    - Section 115X – State significant infrastructure application
    - Section 115ZA – Secretary’s Environmental Assessment Report
    - Section 115ZB – Infrastructure Approval
    - Section 115Y – Director General Requirements

- A number of key considerations take place under the Environmental Impact Statement, including but not limited to:
  - An assessment of the noise impacts of the project during operation, consistent with the *Road Noise Policy (Environment Protection Authority 2011)*.
  - The assessment must include specific consideration of impacts to receivers (dwellings, child care centres, educational establishments, hospitals, motels, nursing homes, or places of worship), as relevant and identify reasonable and feasible mitigation measures.
  - An assessment of construction noise and vibration impacts, consistent with the *Interim Construction Noise Guideline (Department of Environment, Climate Change and Water 2009)*, and *Assessing Vibration: a technical guideline (Department of Environment and Conservation 2006)*.
  - An assessment of construction and operational erosion; sediment and water quality and hydrological impacts on adjacent rivers and creeks:
    - with reference to the *Australian and New Zealand Guidelines for Fresh and Marine Water Quality (ANZECC/ARMCANZ 2000)*
    - taking into account the *Floodplain Development Manual (Department of Natural Resources 2005)*.
  - Management of waste with reference to:
    - *Waste Classification Guidelines (Department of Environment, Climate Change and Water 2009)*.

- An **Environmental Protection Licence** will have to be obtained for the various stages of WestConnex under the *Protection of the Environment Operations Act 1997*. Licence conditions relate to pollution prevention and monitoring, and
cleaner production through recycling and reuse and the implementation of best practice.

- Other related environment and conservation legislation that will need to be considered in the development of WestConnex include:
  - NSW Contaminated Land Management Act 1997 – the object of this Act is to establish a process for investigating and (where appropriate) remediating land that the EPA considers to be contaminated significantly enough to require regulation under Division 2 of Part 3.
  - NSW Water Management Act 2000 – the object of the Act is the sustainable and integrated management of the State’s water for the benefit of both present and future generations.
  - NSW Waste Avoidance and Resource Recovery Act 2001 – the key objects of the Act is to minimise the consumption of natural resources and the final disposal of waste by encouraging the avoidance of waste and the reuse and recycling of waste.
  - NSW Dangerous Goods (Road and Rail Transport) Act 2008 - The purpose of this Act is to regulate the transport of dangerous goods by road and rail in order to promote public safety and protect property and the environment.
  - Heritage Act 1977 – the object of the Act is to encourage the conservation of the State’s heritage and to provide for the interim protection of items of State heritage significance.
  - NSW Soil Conservation Act 1938
  - Fisheries Management Act 1994

- All property acquisitions will be negotiated in accordance with the RMS Land Acquisition Policy, and compensation will be assessed under the provisions of the Land Acquisition (Just Terms Compensation) Act 1991:
  - Owners may also be eligible for other payments such as: legal costs (including conveyancing); valuation fees; relocation expenses (including stamp duty costs in connection with the purchase of another property of equal value); mortgage re-establishment costs and other payments.

- Despite the limited habitat in the study area, some threatened fauna species listed under the Threatened Species Conservation Act 1995 and/or the Environment Protection and Biodiversity Conservation Act 1999 or their habitats will need to be considered as part of the WestConnex project.
  - The Environment Protection and Biodiversity Conservation Act 1999 is the Australian Government’s central piece of environmental legislation. It provides a legal framework to protect and manage nationally and internationally important flora, fauna, ecological communities and heritage places.

- WestConnex developers may be required to obtain an Aboriginal Heritage Impact Permit under the National Parks and Wildlife Act 1974 if harm to an Aboriginal object or Aboriginal place cannot be avoided.
5.1 Legislation related to funding and financial administration of WestConnex

- **NSW Appropriation Act 2015** appropriates out of the Consolidated Fund sums for the recurrent services and capital works and services of the Government for the year 2015–16 – included are aforementioned expenditure to Roads and Maritime Services and Sydney Motorway Corporation for WestConnex project delivery.
  
  o **Appropriation Bill 2015**

- **Electricity Network Assets (Authorised Transactions) Act 2015**
  
  o This authorises the Government to undertake a long-term lease of 49 per cent of the electricity networks, introducing private investment and management into TransGrid, Ausgrid and Endeavour.
  
  o WestConnex northern and southern extensions will be funded through the **Rebuilding NSW** funds generated from the sale.

- **Restart NSW Fund Act 2011**
  
  o Restart NSW was established to fund the delivery of priority infrastructure projects (including WestConnex).
  
  o As at 30 June 2015, $9.2 billion is expected to have been deposited in the Restart NSW Fund, sourced from asset recycling initiatives, Waratah Bonds, interest income and windfall tax revenues.\(^5\)
  
  o The Government allocates Restart funding to projects on the advice of Infrastructure NSW (which was established under the **Infrastructure NSW Act 2011**).

- **Public Finance and Audit Act 1983**
  
  o **Public Finance and Audit Amendment (WestConnex Delivery Authority) Proclamation 2014** - The object of this Proclamation is to provide for the WestConnex Delivery Authority to be a statutory body for the purposes of the **Public Finance and Audit Act 1983**.

- **Public Authorities (Financial Arrangements) Act 1987**
  
  o **Public Authorities (Financial Arrangements) Amendment (Sydney Motorway Corporation Pty Ltd) Regulation 2014** - The object of this Regulation is to include Sydney Motorway Corporation Pty Ltd and its subsidiaries in the definition of controlled entity in the **Public Authorities (Financial Arrangements) Act 1987**.
  
  o **Public Authorities (Financial Arrangements) Amendment (Sydney Motorway Corporation Pty Ltd) Regulation (No 2) 2014** - The object of this Regulation is to prescribe an additional investment power in respect of the shareholders of Sydney Motorway Corporation Pty Ltd (currently the Treasurer and the Minister for Roads and Freight).
  
  o **Public Authorities (Financial Arrangements) Amendment (Sydney Motorway Corporation Pty Ltd) Regulation 2015** - The object of this

\(^5\) NSW Treasury, **Budget Paper No.2**, 2015-16, Infrastructure Statement, p. A-9
WestConnex: a timeline of key developments

Regulation is to authorise the Treasurer to make certain investments in Sydney Motorway Corporation and any of its subsidiaries.

6. WESTCONNEX FUNDING AND PROJECT DELIVERY

Total NSW government funding for WestConnex comprises $1.8 billion from Restart NSW toward WestConnex, $928 million from the Consolidated Fund and $1.5 billion in grant funding from the Commonwealth Government. The Commonwealth Government also agreed to provide a separate $2.0 billion concessional loan to accelerate the delivery of Stage 2 (M5 East tunnels). As outlined in the NSW Auditor-General report:

The balance of the funding for the scheme will come from private sector debt and equity capital raised against tolls on completed stages of the Project, with the recycling of Government capital invested in the individual stages of WestConnex once traffic volumes are established.

As outlined in the 2015-16 NSW Budget:

- $993m in funding was allocated to Roads and Maritime Services for WestConnex in 2015-16, on top of the $324.5m allocated to 30 June 2015.
- WestConnex Stage 1 Allocation for Sydney Motorway Corporation and its subsidiaries in 2015-16 is $404.2m (Total Spend to 30-06-15 - $105.7m)
- WestConnex Stage 2 Allocation for Sydney Motorway Corporation and its subsidiaries in 2015-16 is $322.9m (Total Spend to 30-06-15 - $60.3m)

Figure 2: Original Westconnex Financing Structure – Note there are plans to amalgamate the Sydney Motorway Corporation and WestConnex Delivery Authority

---

6 NSW Treasury, Budget Paper No.2, 2015-16, Infrastructure Statement, Chapter 1.4, p.1-4
7 NSW Treasury, Budget Paper No.2, 2015-16, Infrastructure Statement, Chapter 1.4, p.1-4
8 NSW Auditor-General, Westconnex: Assurance to the Government, December 2014, p.8
9 NSW Treasury, Budget Paper No.2, 2015-16, Infrastructure Statement, p.6-5
10 NSW Treasury, Budget Paper No.2, 2015-16, Infrastructure Statement, p.6-5
In October 2013 the Government established the WestConnex Delivery Authority to lead the delivery of the project. In August 2014 the Sydney Motorway Corporation, a State-owned incorporated company, was set up separately to the WestConnex Delivery Authority to organise the financing of WestConnex. This company is governed by a majority independent board of directors that will ensure commercially responsible investments. The Treasurer and the Minister for Roads and Freight are joint shareholders.

As reported in the *Sydney Morning Herald*, the WestConnex Delivery Authority and Sydney Motorway Corporation will be merged due to “governance issues”. The WestConnex Delivery Authority released a statement regarding these changes:

> …the NSW Government has taken the opportunity to evolve the early governance model created to deliver the WestConnex. This has resulted in the transfer of the project delivery functions…to the Sydney Motorway Corporation.

Of the $3.3 billion in total funding, Sydney Motorway Corporation will be capitalised with seed capital of up to $2.7 billion in shareholder funds to enable delivery of WestConnex.

Subsidiaries of Sydney Motorway Corporation will be created to contract with the private sector to design, build and finance the individual stages of WestConnex:

- WestConnex M4 Pty Limited will commence construction of the M4 Widening in early 2015. This will provide four lanes in each direction between Church Street, Parramatta and Homebush Bay Drive, Homebush.
- WestConnex M5 Pty Limited will begin construction of Stage 2 in mid-2015. Significant private sector involvement will be sought. Stage 2 increases capacity along the M5 East corridor, and extends the motorway to St Peters. It will also include a new access link to the Sydney Airport area.

7. WESTCONNEX COSTS

The estimated cost of WestConnex has been revised several times. In 2012 the Integrated Project Team estimated the cost to be $10 billion, including property acquisition costs. 75% of this cost would be sourced from user charges, with the NSW and Commonwealth Governments providing the remaining $2-3 billion.

The 2013 WestConnex Business Case Executive Summary (2013 Business Case) estimated that the project would cost $11-11.5 billion, with the NSW Government providing $1.8 billion upfront and the Commonwealth Government providing $1.5 billion over 4 years from 2013-14.

In 2014 Infrastructure NSW revised total project costs to $14.9 billion, including $1.8 billion for the northern and southern extensions. The Commonwealth Government also agreed to provide a $2 billion concessional loan to bring forward delivery of Stage 2.

---

11 Sydney Morning Herald, *WestConnex governance shake-up as Parramatta Road tunnel nears*, 3 June 2015
As outlined in the NSW Budget 2015-16, with approved scope changes and increases in land acquisition costs, the estimated nominal outturn cost for the WestConnex project is $15.4 billion.\(^\text{12}\)
