

APPENDIX 1

VICTORIAN LOCAL GOVERNMENT AREA (LGA) DATA TABLES

RESULTS BASED ON RESIDENTIAL LGA OF AGGRIEVED FAMILY MEMBER / VICTIM AT TIME PRESENTING TO THE HOSPITAL EMERGENCY DEPARTMENT (VEMD), APPLICATION FINALISED (COURT DATA) OR FAMILY VIOLENCE INCIDENT REPORT (POLICE DATA)

The Appendix to this report contains information on family violence incidents reported in public hospital emergency departments, to police and finalised intervention order applications in the Magistrates' and Children's courts of Victoria, by the residential Victorian Local Government Area (LGA) for aggrieved family members / victims.

Each year the VFVD project receives many requests for LGA level data and therefore produced this Appendix to provide information for the seven year period 1999-2006.

The data tables included in this Appendix provide a summary of key variables for each LGA (residential LGA of aggrieved family member / victim). The tables are provided primarily to assist LGAs with information about family violence within their local area for planning purposes.

The data tables present overall summary counts and percentages for the LGAs, and are presented in alphabetical order for each of the LGAs. Many LGAs have small numbers of aggrieved family members / incidents presenting in any given year. Caution must be used when analysing data for areas with small populations as a small shift of only a few cases across different categories can have a large impact on the percentage rates in any given year.

See pages 23-32 of the main report for a complete explanation of the data sets included in this report and Appendix.

Overview of the Police Data contained in this Appendix

The Database holds data extracted from Victoria Police family violence incident reports. Police officers are required to complete a family violence report when they attend a family violence incident. The report documents the parties involved in the incident (the aggrieved family member and the other party) and their demographic details, others present (including children), and the relationship between the parties involved.

Victoria Police procedures require police to submit a family violence incident report regardless of the seriousness of the incident, whether criminal charges were laid, whether a complaint for an intervention order was made, or whether the aggrieved family member was advised to take action on their own behalf. The legal basis for applying for intervention orders on behalf of the aggrieved family member is outlined in legislation (Crimes (Family Violence) Act 1987). The processes for laying charges, applying for intervention orders and making referrals are outlined in Victoria Police policies and procedures. The Code of Practice for the Investigation of Family Violence, outlined earlier in this report in section 2.2, consolidates legislation, policy and procedure and is the key public document governing the police response to family violence in Victoria.

Victoria Police store their data in the Law Enforcement Assistance Program (LEAP) database. Primarily, LEAP is a case management and data storage system, designed primarily for operational purposes, which is updated with new information as it becomes available. Data used in this report were extracted from LEAP and accurate at the time of extraction.

For further discussion of the issues affecting Police data, refer to pages 24 and 25 of the main report.
