Changes in this issue

In this issue the geographic country regions have been aligned with the recently updated Australian Bureau of Statistics (ABS) Standard Australian Classification of Countries (SACC), 2011 (ABS catalogue 1269.0). This has resulted in a number of changes to these groups. The major changes include:

Africa

North Africa now includes Southern Sudan; Sudan and Western Sahara. *West Africa* (now excluding Western Sahara) has been renamed *Central & West Africa* while *South & East Africa* (now excluding Southern Sudan and Sudan) has been renamed *Southern & East Africa*.

Asia

A new sub-geographic category of *Central Asia* has been included. This group includes: Afghanistan (previously included in *South Asia*); Armenia; Azerbaijan; Georgia; Kazakhstan; Kyrgyzstan; Tajikistan; Turkmenistan and Uzbekistan, all previously included in *Europe*. *South Asia* has been renamed *Southern Asia*.

Europe

East Europe and *West Europe* have been replaced with *Eastern Europe*, *Northern Europe*, *South Eastern Europe*, *Southern Europe* and *Western Europe*. As noted above Armenia; Azerbaijan; Georgia; Kazakhstan; Kyrgyzstan; Tajikistan; Turkmenistan and Uzbekistan, have been moved from *Europe* to *Asia*.

Oceania & Antarctica

Oceania has been renamed *Oceania & Antarctica*. *Other Pacific Islands* has been renamed to *Other Oceania & Antarctica*.

The geographic groups now align with the ABS SACC with a few minor exceptions. Turkey is included in Europe not the Middle East as recommended in the SACC, Bermuda is included in the Caribbean not North America. These exceptions allow goods and services data to be added together on a consistent basis.

The full definitions of the revised geographic groups are included in **Appendix B** in this publication. For more information please also refer to the [ABS SACC](#).

A WORLD OF TRADE DATA AT YOUR FINGERTIPS

UP TO DATE TRADE STATISTICS SERVICES TAILORED TO YOUR NEEDS FROM AUSTRALIA'S PREMIER SOURCE

In so many industries, knowledge is the key to success. And it's the quality of that information that's paramount.

Now you can access Australian trade statistics gathered and held by Australia's leading expert in the field, the Department of Foreign Affairs and Trade (DFAT). Better still, this information can be customised and prepared to suit your specific needs.

The Market Information and Research (MIR) Section provides statistics used in research, including measures such as detailed classifications of exports and imports. MIR's data holdings include a substantial amount of economic and social information about Australia and the rest of the world.

Trade data is available in any of the following combinations.

* * Pivot tables * *

AUSTRALIA'S MERCHANDISE EXPORTS AND IMPORTS				
Country and commodity pivot table – 2006 to 2011				
Direction		Exports		
A\$'000		Column Labels		
Row Labels		2006	2010	2011
001 Live animals (excl seafood)		881,973	1,143,956	1,071,206
Indonesia		246,972	320,773	276,794
Kuwait		68,571	113,069	124,632
China		15,393	116,580	120,957
Turkey			75,679	90,178
Qatar		13,877	43,243	57,872

In addition to the regular PDF release of the 2011 edition of the **Composition of Trade** publication, an expanded range of the tables in **Section 6 and Section 7** (Australia's merchandise trading partners) are also being released in pivot table format, using MS Excel. All users with access to MS Excel 2007 or 2010 will be able to download the pivot table, enabling significantly enhanced analysis of the data.

Compared to tables in the PDF version of the publication, the pivot table includes all countries, selected country groups and commodities (versus 95 countries and principal commodities). The time series included is from 2006 to 2011 – this will expand over time.

The pivot tables provide extra analytical power for statistical research, with functions that include the ability to:

- Instantly switch between export and import views and amongst countries, country groups and commodities;
- Pivot the data to switch your analysis from 'country by commodity' to 'commodity by country'; and
- Sort in descending order to find the top commodity exports/imports with a selected country or the top countries of exports/imports for a selected commodity.

The **Explanatory notes** attached to the pivot table spreadsheet describe how to perform these operations.

The pivot table released in conjunction with this publication has been tested for functionality, however it is still considered to be a 'test' version. As such DFAT would appreciate your feedback on the product, so that it can be enhanced over coming releases. The intention is that initially, it will be released together with the PDF version of the publication, however it may be subject to a more frequent release schedule in the future. Feedback can be sent to statssection@dfat.gov.au or contact Brent Perkins on +61 2 6261 3712.

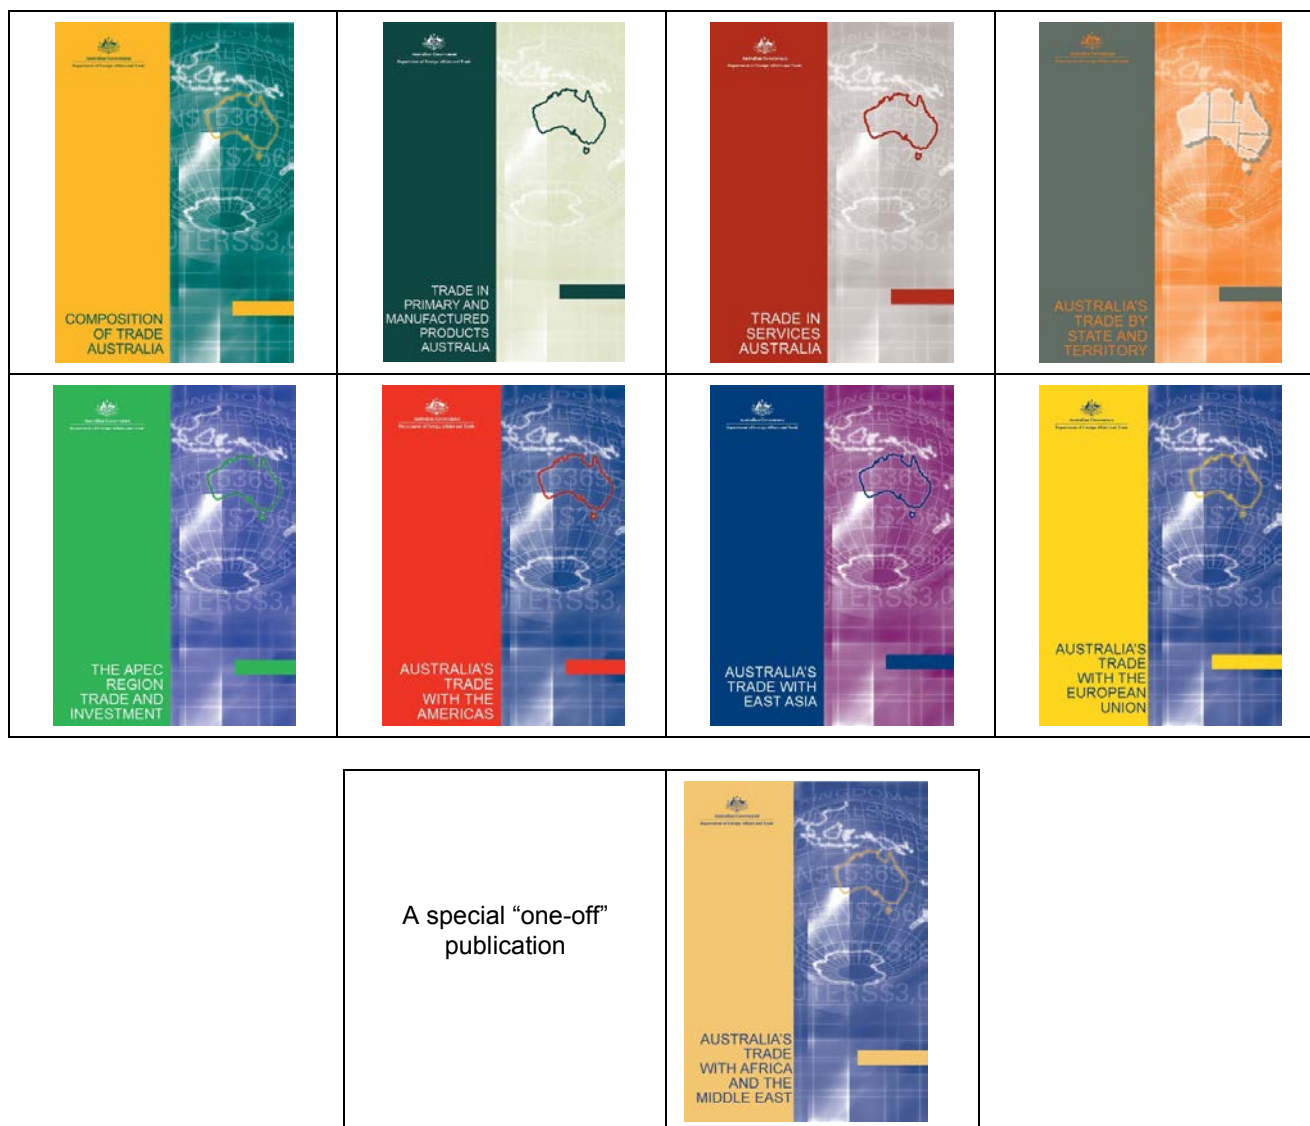

The pivot table can be accessed at the [Composition of Trade](#) webpage.

Trade statistical publications

Each year MIR produces a range of publications containing detailed information on all aspects of Australia's trade in goods and services with the rest of the world. These are available as accessible PDFs at

<http://www.dfat.gov.au/publications/statistics.html>

Releases in the series include:

Market information service

MIR provides accurate and timely, high-level statistical support for research and analysis. The consultancy service also draws on international sources to compile the most comprehensive coverage available, so you can have a world of trade information individually prepared to your requirements and delivered quickly, accurately and at a very competitive price.

- Reports can be "tailor-made" according to requirements
 - by country and by commodity
 - monthly, quarterly and for calendar or financial years
 - using a wide range of economic indicators.
- MIR prepares general profiles of economic and social indicators for Australia's trading partners
 - country economic factsheets (180 countries currently available).

For more information about our service email statssection@dfat.gov.au or visit the website <http://www.dfat.gov.au/publications/stats.html>; or www.dfat.gov.au/geo/fs for free fact sheets

Australia's trade highlights 2011¹

Australia's total trade in goods and services

Based on ABS catalogues 5368.0 and 5302.0.

- The value of total trade in goods and services increased 9.9 per cent to \$608.2 billion (see **Box 1**).
- In volume terms, total trade increased 5.1 per cent in 2011 compared with 2010
 - since 2006, total trade values have increased by an average of 6.4 per cent per annum while volumes increased 4.8 per cent per annum.
- The trade balance recorded a trade surplus of \$18.3 billion in 2011, up \$3.1 billion on the surplus of \$15.2 billion in 2010.

Australia's exports of goods and services

Based on ABS catalogues 5368.0 and 5302.0.

- The value of exports increased 10.2 per cent to \$313.3 billion
 - since 2006, export values have increased by an average of 8.0 per cent per annum.
- Export volumes decreased 1.3 per cent
 - export volumes have risen by an average rate of 3.0 per cent per annum since 2006.

Australia's imports of goods and services

Based on ABS catalogues 5368.0 and 5302.0.

- The value of imports increased 9.6 per cent to \$294.9 billion
 - since 2006, import values have increased by an average of 4.9 per cent per annum.
- Import volumes increased 11.2 per cent
 - import volumes have risen by 6.6 per cent per annum since 2006.

¹ Balance of payments basis.

Terms of trade

Based on ABS catalogues 5368.0 and 5302.0.

- Australia's terms of trade² rose 13.2 per cent in 2011
 - this was a result of export prices increasing 11.6 per cent and import prices falling 1.4 per cent.
- Since 2006, export prices have risen by an average rate of 4.9 per cent per annum, while import prices have fallen by 1.6 per cent per annum.

Box 1: Trade overview

In 2011, the balance of trade recorded a surplus of \$18.3 billion, rising \$3.1 billion on the surplus of \$15.2 billion recorded in 2010.

Australia's goods and services exports grew 10.2 per cent to \$313.3 billion in 2011. Export volumes fell 1.3 per cent while export prices rose 11.6 per cent. Exports of *Primary products* rose 18.1 per cent with strong rises in *Minerals* and *Fuels* on the back of higher commodity prices. *Manufactures* exports rose 2.9 per cent while *Other goods* (mainly *Gold* and *Confidential items of trade*³) fell 2.3 per cent. *Services* exports declined 3.4 per cent.

In 2011, Australia's goods and services imports rose 9.6 per cent to \$294.9 billion. Import volumes rose 11.2 per cent while import prices decreased 1.4 per cent.

The relative price of our exports in terms of our imports is reflected in Australia's terms of trade, which rose by 13.2 per cent in 2011.

² The terms of trade are calculated as the ratio of the prices we receive for our exports to the prices we pay for our imports.

³ For further information on *Confidential items of trade* refer to the **Explanatory notes** and **Appendix D**.

Australia's composition of trade⁴

Exports

- In 2011, exports of *Primary products* increased 18.1 per cent to \$196.3 billion (mainly reflecting increases in energy and iron ore prices), *Manufactures* rose 2.9 per cent to \$41.5 billion, *Other goods* (mainly *Gold*) exports fell 2.3 per cent to \$24.0 billion and exports of *Services* fell 3.4 per cent to \$50.1 billion.

Broad composition of exports: 2006 and 2011

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5302.0.

- Iron ore & concentrates* (\$64.1 billion, accounting for 20.5 per cent of total exports), *Coal* (\$46.8 billion, accounting for 14.9 per cent of total exports), *Gold* (\$16.0 billion, accounting for 5.1 per cent of total exports) and *Education-related travel services* (\$15.1 billion, accounting for 4.8 per cent of total exports) were Australia's largest individual export items.

Australia's principal exports

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5302.0.

- Principal items recording a rise in exports in 2011 included: *Iron ore & concentrates*, up \$14.7 billion (or 29.8 per cent) to \$64.1 billion; *Coal*, up \$3.8 billion (or 8.8 per cent) to \$46.8 billion; *Wheat*, up \$1.9 billion (or 45.4 per cent) to \$6.1 billion; *Natural gas*, up \$1.7 billion (or 17.6 per cent) to \$11.1 billion and *Cotton*, up \$1.5 billion (or 143.5 per cent) to \$2.5 billion while *Education-related travel services* fell \$2.2 billion (or 12.8 per cent) to \$15.1 billion.

⁴ Goods on a recorded trade basis and services on a balance of payments basis.

Imports

- Imports of *Primary products* increased 25.2 per cent to \$52.7 billion in 2011 (reflecting increases in energy products, such as crude petroleum), *Manufactures* rose 3.8 per cent to \$160.8 billion, *Other goods* (mainly *Gold* and *Confidential items of trade*) increased 3.9 per cent to \$13.6 billion and imports of *Services* rose 5.9 per cent to \$59.0 billion.

Broad composition of imports: 2006 and 2011

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5302.0.

- Personal travel (excluding education) services* (\$22.2 billion, accounting for 7.5 per cent of total imports); *Crude petroleum* (\$20.8 billion, accounting for 7.1 per cent of total imports), *Refined petroleum* (\$14.3 billion, accounting for 4.9 per cent of total imports); and *Passenger motor vehicles* (\$14.2 billion, accounting for 4.8 per cent of total imports) were Australia's largest import items.

Australia's principal imports

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5302.0.

- Principal items which recorded a rise in imports in 2011 included: *Crude petroleum*, up \$4.6 billion (or 28.4 per cent) to \$20.8 billion; *Refined petroleum*, up \$4.3 billion (or 43.5 per cent) to \$14.3 billion; *Personal travel (excluding education) services*, up \$1.8 billion (or 8.9 per cent) to \$22.2 billion; *Civil engineering equipment & parts*, up \$1.2 billion (or 39.6 per cent) to \$4.3 billion and *Telecom equipment & parts*, up \$788 million (or 10.5 per cent) to \$8.3 billion while *Passenger motor vehicles* imports fell \$1.8 billion (or 11.0 per cent) to \$14.2 billion.

Australia's direction of trade

- China was Australia's largest individual two-way goods and services trading partner in 2011, accounting for 19.9 per cent (\$121.1 billion) of total trade. Japan was the second largest trading partner accounting for 11.9 per cent (\$72.5 billion) followed by the United States^(a), accounting for 8.9 per cent (\$54.2 billion).
- APEC^(a) members accounted for 71.0 per cent of Australia's total trade while the members of the European Union accounted for 13.4 per cent.
- Exports to: APEC members increased 14.4 per cent; ASEAN members rose 18.5 per cent; OECD countries increased 9.6 per cent; and members of the European Union rose 3.1 per cent.
- Imports from: APEC^(a) members rose 6.5 per cent; ASEAN members rose 5.0 per cent; OECD^(a) countries rose 5.8 per cent; and members of the European Union increased 4.6 per cent.

Major goods and services export markets

- China was Australia's largest export market, accounting for 24.6 per cent (\$77.1 billion) of total exports in 2011
 - rising 19.9 per cent.
- Japan was Australia's second largest export market (\$52.4 billion)
 - increasing 14.7 per cent.
- the Republic of Korea was Australia's third largest market (\$25.0 billion)
 - rising by 11.8 per cent.

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5368.0.55.003.

Major goods and services import sources

- China was Australia's largest import source, accounting for 14.9 per cent (\$43.9 billion) of total imports in 2011
 - increasing 7.4 per cent.
- The United States^(a) was Australia's second largest import source (\$39.3 billion)
 - rising 11.5 per cent.
- Japan was Australia's third largest import source (\$20.1 billion)
 - decreasing 1.6 per cent.

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5368.0.55.003.

(a) Includes US confidential aircraft imports from Sep 2008 onwards from unpublished ABS data.

Commodity forecasts

- The Australian Bureau of Agricultural & Resource Economics & Sciences (ABARES) and the Bureau of Resources & Energy Economics (BREE) have forecast the value of Australia's commodity exports to rise by 6.7 per cent in 2012-13. Export volumes—in real terms—will rise by 7.8 per cent in 2011-12 (no forecast is available for 2012-13). See **Table A** for more details.

Table A: Forecasts for major commodity exports

	2010-11 \$m	2011-12 \$m	2012-13 \$m	2010-11 to 2011-12 %	2011-12 to 2012-13 %

Australia's Resources exports 2001 to 2011

This article is an update of the DFAT article "Australia's Resources exports 1999 to 2009" published in March 2010.

Resources have been an important export sector for Australia since the 1850s gold rush. Over the past 10 years exports of resources have increased over three-fold from \$57.1 billion in 2001 to \$190.5 billion in 2011. Despite the Global Financial Crisis, strong world growth over the period, particularly in East Asia, has given rise to higher commodity prices. This has resulted in the growth in Australia's nominal exports over the period being dominated by resources. Their share in total exports has risen from 36.2 per cent in 2001 to 60.8 per cent in 2011.

The significant rise in the nominal value of resources exports has played a major part in the growth in Australia's terms of trade over the past 10 years (through increased export prices). The increase in the terms of trade has led to a significant rise in Australia's Real Gross Domestic Income.

Overall trends in resources exports

The value of Australia's exports of *Resources*¹ have increased from \$57.1 billion in 2001 to \$190.5 billion in 2011 (see **Chart 1**). This represents an average growth of 15.0 per cent per annum, compared with total Australian exports that grew by just 8.4 per cent on average per annum (and non-resource exports growing by just 2.8 per cent per annum). *Resources* as a share of Australia's exports accounted for 36.2 per cent in 2001, rising to 60.8 per cent in 2011.

In volume terms, *Resources* exports experienced an average annual growth of 3.5 per cent, compared with total Australian exports, which rose by an average 2.7 per cent per annum over the period.

Growth in both value and volume terms has been stronger in the past five years (2006 to 2011) with export values rising by an average 13.5 per cent per annum and volumes rising 4.5 per cent. This rise was driven by demand for resources by emerging economies, such as China and India.

Chart 1: Growth in Resources values and volumes

Based on ABS catalogue 5302.0 and DFAT estimates.

Chart 2: Growth in Resources values by major broad sector

Based on ABS catalogue 5302.0 and DFAT estimates.

¹ *Resources* exports includes *Metal ores & minerals*, *Fuels* and *Metals* (including gold) from ABS Balance of Payment statistics. A DFAT estimate for the value of exports of *Nickel mattes* and *Nickel unworked*, which are not included in ABS resources exports, has been included.

Resources exports by broad type and market

Within *Resources* exports (see **Chart 2**), *Metal ores & minerals* was the largest category, accounting for 46.2 per cent of *Resources* exports in 2011. *Metal ores & minerals* export values have grown from \$15.7 billion in 2001 to \$88.0 billion in 2011, representing average annual growth of 20.7 per cent per annum (with volumes growing 5.0 per cent per annum). *Fuels* was the next largest category accounting for 37.7 per cent of total *Resources* exports in 2011. These exports have grown from \$24.6 billion in 2001 to \$71.9 billion in 2011, representing average annual growth of 14.3 per cent per annum (with volumes growing 3.9 per cent per annum). *Metals (including Gold)* accounted for 16.1 per cent of total *Resources* exports in 2011. *Metals* exports have grown from \$16.7 billion in 2001 to \$30.6 billion in 2011, representing average annual growth of 8.1 per cent per annum (with volumes growing by just 1.4 per cent on average over the same period).

Table 1: Top 5 Resources exports

	2001				2011	
	A\$b	% share			A\$b	% share
Total Resources exports	57.1			Total Resources exports	190.5	
Coal	12.5	21.9	1	Iron ore & concentrates	64.1	33.7
Gold (a)	6.7	11.7	2	Coal	46.8	24.5
Crude petroleum	6.5	11.4	3	Gold (a)	16.0	8.4
Iron ore & concentrates	5.2	9.2	4	Crude petroleum	11.5	6.0
Aluminium	4.7	8.2	5	Natural gas	11.1	5.8

(a) Balance of payments basis.

Based on ABS trade data on DFAT STARS database, ABS catalogue 5302.0 and DFAT estimates.

Australia's top five *Resources* exports in 2011 were *Iron ore*, *Coal*, *Gold*, *Crude Petroleum* and *Natural Gas* (see **Table 1**). These top five exports accounted for 78.4 per cent of all *Resources* exports in 2011. *Iron ore* and *Coal* alone accounted for 58.2 per cent. For more information on the performance of Australia's *Coal* and *Iron ore* exports, refer to the article on **Australia's Coal and Iron ore exports 2001 to 2011** (page 11). In 2001, the top five exports were *Coal*, *Gold*, *Crude petroleum*, *Iron ore* and *Aluminium*.

Chart 3: Australia's Resources exports by major market 2001(a)

Chart 4: Australia's Resources exports by major market 2011(a)

(a) A significant proportion of *Resources* exports are country confidential in ABS trade statistics. The major items are *Natural Gas*, *Alumina*, *Mineral sands*, *Uranium ore*, *Nickel mattes* and *Nickel alloys unworked*. DFAT has included an estimate for these confidential data items in calculating these market shares.

Based on ABS trade data on the DFAT STARS database and DFAT estimates.

In 2001, the top five markets were Japan, Republic of Korea, China, Taiwan and Singapore (see **Chart 3**). Australia's major markets for its *Resources* exports in 2011 were China, Japan, Republic of Korea, India and Taiwan (see **Chart 4**). China and Japan together accounted for 55.9 per cent of Australia's *Resources* exports.

Impact on Australia's terms of trade and Gross Domestic Income

The significant rise in the nominal value of *Resources* commodities has played a major part in the growth in Australia's terms of trade over the period 2001 to 2011 (through increased export prices), especially since 2003 (see **Charts 5 and 6**). The terms of trade has increased 97.3 per cent over the period 2001 to 2011. At its peak in September quarter 2011 it was at its highest level since the early 1950s. The strength of commodity prices has also contributed to the appreciation of the Australian dollar over the period.

The Bank of Canada² found that a commodity price boom has an indirect effect on an economy in the form of rising incomes through the terms of trade benefits. This is best seen by looking at Real Gross Domestic Income (GDI), rather than Real Gross Domestic Product (GDP), as GDI is adjusted for changes in purchasing power resulting from changes in the terms of trade. For the period September quarter 2003 to December quarter 2011 Real GDI increased by 42.3 per cent compared to 26.4 per cent growth in Real GDP.

Chart 7 shows the ratio (or difference) of the relative growth rates of Real GDI to Real GDP for Australia, based on a rolling five year period back to 1964. It shows that the ratio reached a peak of 1.68 and 1.69 in the September and December quarters in 2008, at the peak of the commodity price boom. The ratio then fell back during the Global Financial Crisis (GFC) to 1.32 before rebounding to a high of 1.66 in September quarter 2011 as commodity prices recovered. The increased domestic income from the mining boom comes through increased wages and profits in the mining sector which flow through to increased government revenue through royalties and taxation.

Impact of the Global Financial Crisis (GFC) on Australia's exports of resources

The impact of the GFC offset the commodity price boom from the second half of 2008 as world demand for *Resources* fell resulting in a sharp decline in world commodity prices.

As a result of the GFC, Australia's exports of *Resources* fell \$20.9 billion or 13.7 per cent to \$131.6 billion in 2009. The fall was entirely due to reduced world commodity prices for *Resources*, as export volumes actually rose by 3.3 per cent over the year. Falls were recorded for all broad *Resources* export categories with a particularly large fall in *Fuels*, down \$13.0 billion or 18.7 per cent to \$56.6 billion.

However, commodity prices rapidly recovered from 2010 onwards, with exports of *Resources* in value terms rising \$34.0 billion (or 25.9 per cent) in 2010 and by \$24.9 billion (or 15.0 per cent) in 2011. Export volumes also rose in

² Source: Bank of Canada Review, Autumn 2009 – *Adjusting to the Commodity Price Boom: the Experience of Four Industrialized Countries*.

2010 by 7.8 per cent in 2010 but fell 1.6 per cent in 2011. This was mainly due to the impact of the Queensland floods, which temporarily reduced *Coal* production with export volumes down 9.5 per cent in 2011.

**Chart 7: Ratio of relative growth rates of
Real Gross Domestic Income and Gross Domestic Product
– based on five year rolling growth**

Based on ABS catalogue 5206.0

Outlook

Industry commitment to increase production and expand infrastructure capacity over the medium term (to 2016-17) are expected to underpin real earnings growth in *Resources* in the medium term. Export volumes are expected to increase for iron ore (62 per cent), metallurgical coal (47 per cent), thermal coal (65 per cent), copper ores and concentrates (77 per cent) and alumina (29 per cent). In particular, a large part of the increase in real export earnings will be driven by growth in LNG exports. With eight projects under construction, LNG export volumes are expected to increase from 20 million tonnes in 2011-12 to over 60 million tonnes in 2016-17.

Accordingly, the Bureau of Resource Energy and Economics (BREE)³ projects *Resources* exports to grow strongly over the medium term. *Resources* exports in real terms are projected to rise to \$224.7 billion in 2016-17 (in 2011-12 prices) a rise of 12.8 per cent from 2011-12, while export values are expected to rise 29.7 per cent to \$258.3 billion.

Australia's Coal and Iron ore exports 2001 to 2011

This article is an update of the DFAT article "Australia's Coal and Iron ore exports 1999 to 2009" published in March 2010.

Coal and Iron ore have been important exports for Australia for decades. Over the past 10 years they have grown in importance, increasing six-fold from \$17.7 billion in 2001 to \$110.9 billion in 2011. With strong world economic growth over most of the period resulting in higher commodity prices, Coal and Iron ore have dominated the growth in nominal exports over the period. These two commodities have grown at an average annual rate of 23.2 per cent per annum over this period, compared to just 4.8 per cent per annum for all other exports. Their share in total goods and services exports has risen from 11.2 per cent in 2001 to 35.4 per cent in 2011.

Coal and Iron ore have been the driving force in the significant increase in Resources exports and thus to the growth in Australia's terms of trade.

North Asia is Australia's primary market for Coal and Iron ore. These commodities dominate trade with this region.

Overall trends in Coal exports

Australia's *Coal* exports largely comprise two forms of bituminous coal of coal – thermal and metallurgical. Thermal coal (the softer form of bituminous coal) is used mainly for electricity generation, whilst metallurgical coal (the harder form of bituminous coal) is used in the manufacture of steel. Metallurgical coal exports are almost twice as large as thermal coal exports.

The value of Australia's *Coal* exports has risen significantly in recent years. Strong growth in electricity generation (India and China) and world steel production supported volume growth. This was supported by robust price rises through to the Global Financial Crisis.

Over the past 10 years (2001 to 2011), the value of coal exports rose from \$12.5 billion in 2001 to \$46.8 billion in 2011, a rise of almost 300 per cent.

Within the overall *Coal* figures, both thermal and metallurgical coal exhibited very strong growth through to the GFC (see **Charts 1 and 2**). Following the crisis, the value of exports levelled off, with exports in 2011 virtually the same as exports in 2008. Thermal coal exports rose from \$4.8 billion to \$15.6 billion (up well over 200 per cent). Metallurgical coal exports rose from \$7.6 billion to \$31.1 billion (up just over 300 per cent), and just shy of the 2008 high of \$32.3 billion.

Chart 1: Exports of thermal coal

Based on ABS trade data on the DFAT STARS database.

Chart 2: Exports of metallurgical coal

Based on ABS trade data on the DFAT STARS database.

Charts 3 and 4 show a disaggregation of the values of *Coal* exports into their price and volume components and display an index of change over the period 2001 to 2011.

Thermal coal

- Thermal coal volumes have displayed steady growth over the period, up 70.0 per cent. And while on balance the price of the commodity ended the analysis period with a stronger overall rise than volumes, it observed considerably more volatility throughout the period.
- By the end of the analysis period the price of thermal coal finished up nearly 90 per cent higher relative to the start. The large increases in value shown in **Chart 1** are leveraged more to price than to volume.

Metallurgical coal

- The price effect on metallurgical coal exports over the period 2001 to 2011 was more pronounced than for thermal coal. It started tracking higher than volumes from 2004, then fell back before surging in 2008.
- The price for metallurgical coal finished at a point nearly 230 per cent higher than when the series started.
- The volume of metallurgical coal exports was 25.0 per cent higher in 2011 relative to 2001.

Major markets for Coal exports

Thermal coal

In 2011, the volume of world trade in thermal coal was estimated at 837.0 million tonnes¹. Australia ranked as the world's second largest exporter, accounting for 16.8 per cent of that trade. Indonesia was first with 36.1 per cent and the Russian Federation was third, with 11.6 per cent.

Accounting for nearly half the value of Australia's thermal coal exports in 2011, Japan was the stand-out buyer (47.3 per cent), followed by the Republic of Korea (18.7 per cent) and China (12.7 per cent) (see **Chart 5**). Over the entire 2001 to 2011 period, Japan was the largest buyer of Australia's thermal coal. At its peak during the period (2007), Japan accounted for 60.2 per cent of the value of Australia's thermal coal exports. China was the big mover over the period, particularly over the last four years, rising from 1.5 per cent of thermal coal exports in 2007 to 12.7 per cent in 2011.

¹ Source: Bureau of Resource Energy Economics (BREE) Resources and Energy Quarterly – June qtr 2012.

Metallurgical coal

World trade in metallurgical coal in 2011 was estimated at 270 million tonnes² and Australia continued its rank as the number one exporter of this commodity, accounting for about half (49.3 per cent) of the total. The United States was next with 20.4 per cent.

Japan was Australia's largest export market for metallurgical coal in 2011, accounting for just under 30 per cent (29.8 per cent) of the total value. India was the second largest (22.9 per cent), followed by the European Union (EU at 14.7 per cent) (see **Chart 6**). Japan's share of Australia's metallurgical coal exports remained fairly constant over the period, ranging from 27.2 per cent in 2010 to a peak of 36.9 per cent in 2008. China had stood out as the growth market, surging from 0.9 per cent of the value of exports in 2008 to 17.6 per cent in 2009, however it fell back in 2011 to 8.1 per cent.

With \$4.6 billion worth of metallurgical coal exports in 2011, as a single market the EU was Australia's third largest export market by value. Within the EU the top three destinations for Australian metallurgical coal were the Netherlands (27.2 per cent), the United Kingdom (20.1 per cent) and France (13.3 per cent) (see **Chart 7**).

² Source: BREE Resources and Energy Quarterly – June qtr 2012.

Impact of the Global Financial Crisis on Australia's coal exports

During the GFC, the value of coal exports eased, from \$46.6 billion in 2008 to \$39.4 billion in 2009. This was mainly price driven, as volumes were at least able to hold up in the case of metallurgical coal, or continue growing in the case of thermal coal. This was despite the fact that volumes early in the year were affected by severe weather events in Queensland.

Since then the value of thermal coal exports has managed to grow to a new record while the value of metallurgical coal exports has nearly returned to its pre-GFC peak.

Thermal coal prices have recovered to levels that are close to pre-GFC highs, while volumes have kept on growing to reach nearly 148 million tonnes in 2011. The volume of thermal coal exports grew in every year of the analysis period. In 2001 Australia exported around 87 million tonnes meaning that exports have grown by an average of approximately 5.7 million tonnes each year since 2001.

Prices for metallurgical coal have also recovered to near pre-GFC highs, surging by over 25 per cent between 2010 and 2011. Volumes in 2011 were also consistent with pre-GFC, however they did fall back from their 2010 peak (down nearly 17 per cent from 159 million tonnes to 132 million tonnes).

Future outlook

The outlook for exports of both thermal and metallurgical coal is strong volume growth combined with easing prices, based on research released by the Bureau of Resource Energy Economics (BREE)³ for the coming five years.

Thermal coal prices are expected to ease in real terms in the period out to 2016-17, although prices will remain relatively high in a historical sense. However, increases in the volume of thermal coal imports, driven predominantly by countries in Asia, such as China and India, will promote higher earnings for Australian thermal coal exporters. In 2011-12 BREE expects the volume of Australia's coal exports to increase by 13 per cent. Looking forward, BREE expects the volume of exports to continue rising at an average annual rate of 11 per cent out to 2016-17.

If this projected growth eventuates, Australia will export 268 million tonnes of thermal coal by 2016-17, accounting for about a quarter of world import requirements of more than a billion tonnes.

Export volumes of metallurgical coal are forecast to increase by an average 8 per cent per annum out to 2016-17 after a rise of 6 per cent in 2011-12. Increased steel production in India, China and Brazil is expected to underpin growth in demand. Growth in Australia's exports will be supported by start-ups of new projects and expansion of current ones, as well as increased infrastructure capacity in Queensland. However with softer prices, in real terms BREE expect the value of Australia's metallurgical coal exports in 2016-17 to be about the same as in 2010-11.

³ Source: BREE Resource and Energy Quarterly – June qtr 2012.

Change in composition of Australia's exports to its primary markets for Coal and Iron ore 2001 to 2011

The primary markets for Australia's exports of *Coal* and *Iron ore* were China, Japan and the Republic of Korea in 2011. Over the period 2001 to 2011, a significant shift in the composition of Australia's exports towards these products can be observed for these markets. In 2011, *Coal* exports were our largest exports to Japan (*Coal* was our second largest export to China and the Republic of Korea) while *Iron ore* exports were our largest export to China and the Republic of Korea (*Iron ore* was our second largest export to Japan).

Composition of Australia's exports to China

Composition of Australia's exports to Japan

Composition of Australia's exports to the Republic of Korea

Based on ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2012).

Overall trends in Iron ore exports

The value of Australia's exports of *Iron ore* have increased from \$5.2 billion in 2001 to \$64.1 billion in 2011 (see **Chart 8**). This represents average growth of 31.9 per cent per annum, compared with total Australian exports that grew by just 8.4 per cent on average per annum. As a result, the share of Australian exports accounted for by *Iron ore* rose from 3.3 per cent in 2001 to 20.5 per cent in 2011. *Iron ore* was ranked Australia's largest export in 2011.

Australia is the world's largest exporter of *Iron ore* and accounted for around 40 per cent of world exports in 2011⁴. The majority of Australian *Iron ore* exports are from Western Australia (97.0 per cent).

In volume terms, exports of *Iron ore* have increased from 157 million tonnes (Mt) in 2001 to 438 Mt, representing average annual growth of 11.1 per cent per annum, while average prices received for a tonne of *Iron ore* have risen from an average of \$33 per tonne in 2001 to \$146 in 2011.

The significant growth in *Iron ore* exports over the past seven years was mainly due to increases in export prices from 2004 to 2011 (see **Chart 9**). The average price received for *Iron ore* grew 23.4 per cent on average per annum over the past seven years on the back of the commodity boom compared with prices falling 5.1 per cent in the first three years (2001-2004).

Growth in export volumes has been more steady over the 10 year period, growing by 10.5 per cent on average per annum between 2001 and 2006 and then accelerating to 12.9 per cent in the past five years. The acceleration in export volumes in the past five years was due to Australian companies increasing output from existing iron ore mines (on the back of significantly increased world demand) in conjunction with increased investment in the mining industry which grew significantly, from \$22.2 billion in 2006 to \$63.5 billion in 2011 (see **Chart 10**).

Major markets for Australia's iron ore

Australia's major exports markets for *Iron ore* were China, Japan and the Republic of Korea. In total they accounted for 96.8 per cent of Australia's *Iron ore* exports in 2011 (see **Chart 11**). The only other significant market for *Iron ore* exports in 2011 was Taiwan, valued at \$1.9 billion and accounting for 3.0 per cent of total *Iron ore* exports.

⁴ Source: BREE Resources and Energy quarterly – June qtr 2012.

Chart 10: Investment in the mining industry

Based on ABS catalogue no. 5625.0.

Chart 11: Australia's exports of Iron ore by major market, 2011

Based on ABS trade data on the DFAT STARS database.

China was Australia's largest market for *Iron ore*, accounting for 68.7 per cent or \$44.3 billion in 2011 (and has been number one since 2004). Export values have increased by an average 46.4 per cent per annum since 2001, while export volumes have increased by 24.4 per cent on average (see **Chart 12**). The increase in demand for *Iron ore* by China is due to the large increase in Chinese steel production, which has risen from 152 Mt⁵ in 2001 to 683 Mt in 2011 and accounted for 45.2 per cent of world steel output⁶.

Over the past 10 years, Australia was the largest source of imports of *Iron ore* by China and accounted for 44.1 per cent of total China imports of *Iron ore* in 2011.

Japan was Australia's second largest market for Australian *Iron ore*, accounting for 17.5 per cent or \$11.3 billion in 2011. Export values have increased by an average 18.9 per cent per annum since 2001, while export volumes to Japan have increased by just 0.03 per cent on average (see **Chart 13**). Japan was Australia's largest market for *Iron ore* until 2003.

Over the past 10 years, Australia was the largest source of imports of *Iron ore* by Japan and accounted for 58.2 per cent of total Japanese imports of *Iron ore* in 2011.

Chart 12: Australia's exports of Iron ore to China

Based on ABS trade data on the DFAT STARS database.

Chart 13: Australia's exports of Iron ore to Japan

Based on ABS trade data on the DFAT STARS database.

⁵ World Steel Association – crude steel production data (www.worldsteel.org).

⁶ Source: BREE Resources and Energy quarterly – June qtr 2012.

The Republic of Korea was Australia's third largest market for *Iron ore*, accounting for 10.6 per cent or \$6.9 billion in 2011. Export values have increased on average by 24.7 per cent per annum, while export volumes rose 5.4 per cent on average. Over the past 10 years Australia was the largest source of *Iron ore* imports for Korea.

Impact of the Global Financial Crisis on Australia's exports of Iron ore

The impact of the Global Financial Crisis seems to have had little impact on the value of Australia's exports of *Iron ore* in 2009, which fell only 0.3 per cent in value terms.

The average price received for Australian *Iron ore* exports fell from its pre-GFC peak of \$138 per tonne in October 2008 to \$71 per tonne in December 2009. Even with this significant fall in prices in 2009, they were still well above longer term averages. Export volumes, on the other hand, rose a remarkable 17.3 per cent in 2009, offsetting most of the fall in price.

The impact of the GFC on the performance of Australia's leading *Iron ore* export markets was mixed. For Japan and the Republic of Korea, which both experienced recessions (particularly for Japan), Australian *Iron ore* export volumes plunged in 2009 as world demand for steel fell. Export volumes to Japan fell by 23.1 per cent to 59 Mt, their lowest levels since 1996. Export volumes to the Republic of Korea fell by 16.3 per cent to 28 Mt, their lowest level since 2006.

Australian exports of *Iron ore* to China however, rose strongly, up 45.5 per cent in volume terms, to 267 Mt in 2009. The strong volume growth in exports of *Iron ore* to China in 2009 can be attributed to both the build up of stocks by China steel mills (taking advantage of lower world prices) as well as the increased domestic demand for steel (on the back of the Chinese government's infrastructure investment), which more than offset weaker demand for steel intensive exports.

Exports to Japan and the Republic of Korea recovered strongly in 2010, with export values up 70.3 per cent and 88.2 per cent respectively. Exports to China continued to grow in 2010, up 59.2 per cent. Export prices bounced back to an average of \$123 per tonne in 2010 (and were above pre-GFC levels by June 2010). Prices continued to rise to a record \$158 per tonne in September 2011.

Future outlook

According to BREE⁷, Australian *Iron ore* exports in the medium term are projected to rise, in real terms, by 4.1 per cent per year to reach \$76.8 billion (in 2011-12 dollars) in fiscal year 2016-17. This growth will mainly be driven by increased growth in export volumes, with quantities of *Iron ore* projected to increase from 407 Mt in fiscal year 2010-11 to 767 Mt in 2016-17. *Iron ore* prices are forecast to fall from an average price of \$148 per tonne in 2001-11 to \$100 per tonne in 2016-17.

Australia's imports of aircraft & parts - update for 2011

Introduction

This article updates analysis on the impact of confidentiality in Australia Bureau of Statistics (ABS) international merchandise trade statistics on imports of aircraft and parts. To avoid divulging commercially-sensitive details of individual firms, the ABS restricts release of statistics on certain commodities. These restrictions have led to the partial suppression of imports of SITC code 792 - *Aircraft, spacecraft & related parts* and related trade country import totals in ABS reported data.

Attachment A to this article provides background information and an update on the methodology used to calculate these estimates of Australian imports of *Aircraft, spacecraft & related parts* and impact on related country import totals.

Estimates of imports of aircraft and related parts in 2011

Australia's imports of *Aircraft, spacecraft & related parts* rose 19.7 per cent (or \$799 million) to \$4.9 billion in 2011, making it Australia's 12th largest import (in terms of goods and services). **Table 1** shows imports of *Aircraft, spacecraft & related parts* by Australia's major sources. For Australia's two top sources, imports from the United States rose 7.6 per cent (or \$125 million) to \$1.8 billion¹ while imports from France rose 44.4 per cent (or \$652 million) to \$2.1 billion in 2011.

**Table 1: Imports of aircraft & parts
(A\$ million)**

United States (a)	2009	152	1,951	2,103
	2010	194	1,456	1,650
	2011	184	1,591	1,775

(a) Excludes imports of military aircraft from Sep-2008 onwards which cannot be separately identified in US merchandise trade data.

Based on ABS & UN merchandise trade data on DFAT STARS database and Global Trade Atlas.

¹ Total imports of aircraft from the United States would be higher for 2011 if an estimate for US military aircraft could be included with a number of F18 Super Hornets imported during 2011.

Impact on country imports and trade balances

Table 2 shows the impact of adding back the confidential *Aircraft, spacecraft & related parts* to the major countries affected. Imports from France (and therefore the EU), and related trade balances are both under reported, although the impacts for Brazil, Canada and Germany are relatively smaller. For the United States in **Table 2** the ABS unpublished import data have been used. The data show that both imports and the related trade balances for the United States are significantly under reported when compared to ABS reported data.

Table 2: Impact on imports and trade balances for Brazil, France, EU27 and the United States (A\$ million)

Attachment A

Methodology for estimating aircraft imports and impact on country import totals

Background

The ABS announced that it had changed the method used in confidentialising data for merchandise imports from the month of September 2008 onwards. Import data commodities that have the confidentiality restrictions of "No commodity details" or "No value details" are now aggregated into a single confidential country code. The ABS publication *International Merchandise Trade: Confidential Commodities List* (catalogue 7352.055.001) lists the commodities (in Harmonized Tariff Item Statistical Code (HTISC) and Standard International Trade Classification (SITC) codes) that are affected by this change².

For import data prior to September 2008, these data are added back into the appropriate country totals (i.e. these totals show the correct level of trade). From September 2008 the confidential data are not being added back into the appropriate country totals. Instead they are published as "No country details" in total Australian import data. This change ensures the confidentiality of ABS data is not breached, however the country totals are now not necessarily showing the correct level of trade.

Table A shows that these commodities in aggregate represented \$6.6 billion or 2.9 per cent of total Australian merchandise imports in 2011.

Table A: Value of No country details not included in country totals

Year	A\$m
2008	2,025
2009	5,490
2010	5,596
2011	6,573

Source: ABS trade data on DFAT STARS database.

Impact on imports of aircraft and related parts

Of the commodity codes affected by this change, SITC code 792 - *Aircraft, spacecraft & related parts* would make up the most significant component.

By comparing ABS import data with partner country export data (e.g. France's exports to Australia), it is possible to obtain more details about Australia's imports of *Aircraft, spacecraft & related parts* for the periods not published by the ABS. This can then be matched to the reported ABS data for 2008 to 2011 to arrive at an estimate of the true value of *Aircraft, spacecraft & related parts* for these years. **Attachment B** lists all the HTISC codes at the 6-digit level that make up SITC 792 and which of those are confidential³.

Based on ABS reported data only, imports of *Aircraft, spacecraft & related parts* (SITC 792) were valued at \$294 million in 2011. This data excludes large aircraft from September 2008 and helicopters, medium-size aircraft and parts of aircraft or helicopters from December 2008.

² This publication is available at the ABS website (www.abs.gov.au).

³ The Australian HTISC classification is fully compatible with the international Harmonized System at the 6-digit level.

It should be noted that data as published by our major trading partners are not fully compatible with data published by the ABS. This is due to timing, coverage and valuation differences that will exist between the two data sets⁴.

Using partner country data to estimate for the confidential ABS data, Australia imported an additional \$4.6 billion of *Aircraft, spacecraft & related parts* in 2011 (which accounted for around 69 per cent of the \$6.6 billion of confidential imports excluded from country import totals in 2011)⁵.

Impact on country imports and trade balances

To calculate the impact on the country imports totals and related trade balances the estimate of aircraft imports not being included in ABS statistics sourced from partner country data has been added to reported ABS country import totals. These estimates of actual country import totals are still under-reported as a range of other non-aircraft import commodities are also not included in country import totals.

In June 2010, the Department of Foreign Affairs and Trade (DFAT) negotiated with the ABS the release of actual country import totals for the United States on a financial and calendar year basis only as a special data service. As a result, total imports from the United States covering all Australian imports from the United States (including the confidential aircraft and non-aircraft import commodities) are now available. DFAT has now replaced ABS reported total import data for the United States with actual total imports for the United States in all its Trade publications (see **Table 2**). The ABS was unable to release this data for other partner countries.

⁴ A particular problem in using this type of analysis to estimate the imports of aircraft into Australia is to exclude imports of aircraft on an operational lease (which the ABS excludes for Australian import statistics). To try to overcome this issue the Civil Aviation Safety Authority's civil aircraft register has been used to try and identify imports of leased aircraft so as to exclude these aircraft in partner country export data.

⁵ In 2009 both the United Kingdom and the United States confidentialised aircraft exports to a degree. For the United States the lower level of confidentiality still enabled the analysis of United States export data and ABS import data to produce an estimate of the value of imports of civil aircraft from the United States (excludes US military aircraft which could not be separately identified in US merchandise trade statistics). However the higher degree of confidentiality in the United Kingdom export statistics prevented the estimation of aircraft imports from the United Kingdom. As a result the estimation of Australian aircraft imports from 2009 onwards excludes imports from the United Kingdom.

(a) All data is on a balance of payments basis, except for goods by country which are on a recorded trade basis.

(b) Excludes imports of aircraft from regional import totals from Sep 2008 onwards (excl the United States - see footnote (c)).

This has a significant impact on import totals for France (EU27). (c) Based on unpublished ABS data and includes confidential aircraft imports for the United States only.

Based on ABS trade data on DFAT STARS database, ABS catalogue 5368.0.55.004 and unpublished ABS data.

Peru	46	37	45	34	0.1	21.6	16.7
Other (b) (c)	10,140	10,302	10,160		17.2	-1.4	1.6

(a) Cells in this table may have been perturbed to protect confidentiality. (b) The ABS only publishes a breakdown of services trade by 34 countries, and therefore a significant component is classified to 'other' countries. If the 'other' countries component could be classified by country it would affect the rankings listed above, especially for the lower ranked countries.

(c) Includes unallocated and confidential trade.

Based on ABS catalogue 5368.0.55.004.

Technical appendices

Appendix A Explanatory notes

Introduction

Composition of Trade 2011 provides details of Australia's merchandise and services trade, export markets, and sources of imports for the years 2009 to 2011 and in selected tables from 2006.

This publication is divided into seven sections. **Section 1** provides data on Australia's trade in goods and services showing commodity and country values and ranking in the latest year. **Section 2** shows Australia's composition of merchandise trade by broad category, commodity ranking, value and growth. **Section 3** provides Australia's composition of services trade by type of activity. **Section 4** lists merchandise trade with each of Australia's trading partners, including net exports, total trade and ranking in the latest year. **Section 5** shows Australia's direction of services trade by country and selected regions. **Section 6** provides a detailed commodity breakdown of Australia's merchandise trade with Country Groups (e.g. APEC, Europe). **Section 7** gives similar details for Australia's major merchandise trading partners (those where Australia's total trade exceeded \$50 million in 2011) – see note below on **Composition of merchandise trade reports**.

Revisions to data

The merchandise trade statistics used to compile this publication are derived by the Australian Bureau of Statistics (ABS) from information provided to the Australian Customs and Border Protection Service by exporters and importers. ABS editing procedures frequently lead to revisions of previously published trade data and may occur for up to seven months after the reference period. Most of these revisions occur in the first month after the reference period.

DFAT uses trade data published three months after the reference period as a close proxy for final trade data for this period. For the 2011 calendar reference year, ABS monthly merchandise trade data as at March 2012 have been used.

This allows DFAT to release its trade publications (and associated country/economic fact sheets) in a more timely fashion, and on a more consistent basis, than awaiting the release of the final trade data for 2011, seven months after the reference period. The minor revisions to the current reference period published after this point will be incorporated in the next financial year issue of this publication.

Sections 1, 3 and 5

The trade data in Sections 1, 3, and 5 were sourced from *International Trade in Goods and Services, Australia*, March 2012 (ABS [catalogue 5368.0](#)), while the chain volume and price index data has been sourced from the *Balance of Payments and International Investment Position Australia*, March quarter 2012 (ABS [catalogue 5302.0](#)).

Series break in Gold exports data

Because of a change in the treatment of *Gold* imported into Australia for processing and subsequent re-export, there is a series break in the *Gold* merchandise trade series between 2008 and 2009. Users need to be careful when interpreting movements between the two years. For more information please refer to the article '*Gold exports: Impact of ABS revised treatments for goods for processing in ABS merchandise trade*', which appeared as [Appendix E in the 2008-09](#) edition of this publication.

Series break in trade in Services data

With the collection of trade in services on a *Balance of Payments Manual*, Sixth edition, 2008 basis the ABS took the opportunity to increase the number of lines available for respondents to report country data on the Survey of International Trade in Services survey forms from the September quarter of 2008 from two to six. This change was undertaken to improve the quality of regional trade in services data and has helped reduce the size of trade in services allocated to the 'Other countries' category from this date.

Users should be aware that movements in regional trade in services data between 2007 and 2008 and 2008 and 2009 may be due in part, to a reclassification from the 'other countries' category to an actual country series rather than an actual increase/decrease in trade with that country.

Confidential data

Goods

To avoid divulging commercially-sensitive details of individual firms, the ABS restricts release of statistics on certain commodities. Such details are aggregated into a 'dump' item (code 988) in most tables. **Appendix D** lists the restrictions applied to confidential export items and the countries most affected. It is worth noting that commodities are frequently added to the confidential list, e.g. as sugar was in January 1998. In such cases the value shown for trade in aggregates containing these items will show a decrease.

The total value will be correct for exports or imports with a particular country, except for total exports to Egypt, Iceland and Bahrain (from March 1992) which exclude alumina. These exports are coded to a 'confidential country' category and cannot be separately identified. As a result, the values of exports to these countries are understated in aggregate by the following amounts: \$785 million in 2006; \$788 million in 2007; \$1.1 billion in 2008; \$502 million in 2009; \$441 million in 2010; and \$620 million in 2011.

Country import totals for all countries from which Australia imports aircraft will exclude some aircraft from September 2008 onwards. As a result, the values of imports from these countries are understated in aggregate by the following amounts: \$2.0 billion in 2008; \$5.5 billion in 2009; \$5.6 billion in 2010 and \$6.6 billion in 2011. Refer to the section on aircraft imports for more details.

Services

To avoid divulging commercially-sensitive details of individual firms, the ABS restricts release of statistics on certain services activities.

The ABS uses perturbation to confidentialise trade in services statistics. Using the perturbation methodology, the data will be perturbed, that is, have noise added to protect the confidential cells. For example, if a cell was deemed to be confidential the ABS would subtract a small amount from another cell, to add to the confidential cell, to ensure that confidentiality was not breached. In most cases the level of perturbation is not significant and should have minimal impact on the analysis of trade in services data.

However, for *Transport services* the perturbation methodology could not be applied due to the small number of businesses in this sector. As a result only a limited number of series can be published.

Bulk wheat exports by partner country

The value of *Bulk wheat* exports by partner country has been confidential in ABS merchandise trade statistics and was included in confidential item 988, however the quantity data by partner was published.

From April 2009, the ABS removed this restriction for *Bulk wheat* exports. **Users should be particularly careful in interpreting movements in wheat exports values by partner country between 2009 and 2010** as the reported value of *Wheat* exports will include *Bulk wheat* from April 2009 onwards.

Raw sugar exports by partner country

The value of *Raw sugar* by partner country is only released by the ABS after a six month lag. However, it is not incorporated into ABS merchandise trade data and is only published separately. Table 19 shows the value of Australia's *Raw sugar* exports by country for the latest period available.

Barley exports by partner country

The value of *Barley* exports by partner country is also only released by the ABS after a six month lag. Unlike raw sugar exports, the data is automatically incorporated into the ABS merchandise trade data after this period. In this publication, *Barley* exports for 2011 include only exports up to September 2011. Exports of *Barley* for the period October to December 2011 are included in confidential items.

Aircraft imports

The ABS changed the way it confidentialised import data from September 2008 onwards. This change affected particularly the treatment of imports of aircraft in ABS merchandise trade statistics.

Country import totals for all countries from which Australia imports aircraft exclude large and medium sized aircraft from September 2008 onwards. This has the most impact on ABS import data for France (and therefore the EU), which is one of Australia's major suppliers of large and medium sized aircraft.

Since June 2010, the ABS has been able to release the actual total country import totals for the United States on a financial and calendar year basis only as a special data service. As a result total imports data are now available from the United States covering all Australian imports from the United States (including both the aircraft and non-aircraft import commodities which have been confidentialised) and have been added to "*Total imports*" and "*Other goods*". This data has also been included into the relevant geographic groups and economic regions (ie the Americas, APEC, NAFTA, North America and the OECD). The ABS was unable to release this data for other partner countries.

For more details regarding the impact of these changes please refer to the article on *Australia's imports of aircraft & parts* at the front of this publication. This article will be updated with the release of each edition of this publication.

To assist users of Australian trade data, the ABS publishes monthly, a list of all Australian Harmonized Export Commodity Classification (AHECC) and Harmonized Tariff Item Statistical Code (HTISC) commodities with confidential restrictions in place in the publication *International Merchandise Trade: Confidential Commodities List* (ABS catalogue 5372.0.55.0.01) available at the ABS website. This publication is an essential reference guide for users of ABS merchandise export statistics to ensure they are interpreting the trade statistics correctly.

Commodity classification

Recorded Trade basis vs BOP basis

The data on merchandise trade in this publication are measured on a recorded trade basis, based upon quantities and values of goods measured as they cross the Australian Customs frontier. They can differ from data presented under the balance of payments (BOP) basis in terms of coverage, valuation and timing.

In this publication, trade is disaggregated by two classifications: the merchandise Trade Import and Export Classification (TRIEC); and the Standard International Trade Classification, Revision 4 (SITCr4).

TRIEC was developed by the Department of Foreign Affairs and Trade to group exports and imports according to their level of processing. The broad levels of the TRIEC are:

- *Primary products*;
- *Manufactures*, divided into *simply transformed* and *elaborately transformed*; and
- *Other goods* (mainly gold and confidential items).

More detailed statistics of exports and imports classified by TRIEC are presented in our publication '*Trade in Primary and Manufactured Products*' (latest edition 2011).

Data in this publication which have been classified according to SITCr4 are shown at the Group (3-digit) level. There are 264 categories at this level.

Balance of payments - Services

Australia's BOP defines services as comprising services provided between Australian residents and non-residents, together with some transactions in goods where, by international agreement, it is not practical to separate the goods and services components (e.g. goods purchased by travellers are classified as services).

Services delivered to non-residents through a foreign branch or subsidiary, for example, services rendered to an Asian company by a branch office of an Australian legal firm in Bangkok, are not defined as a BOP transaction. However, services delivered by a parent company to a foreign-resident subsidiary are defined as international services. Any profits or dividends remitted between an enterprise in Australia and a related enterprise abroad are regarded as an income transaction, not as a service in Australia's BOP.

Australia's BOP statistics are compiled in accordance with the latest international standards determined by the International Monetary Fund, and published in *Balance of Payments Manual*, Sixth edition, 2008 (BPM6).

The ABS Extended Balance of Payments services classification (EBOP) is based on the UN publication *Manual on Statistics of International Trade in Services*. This is an extended services classification that is fully compatible with the BPM6.

In this classification, services commodities are broken down into 12 major groups: *Manufacturing services on physical inputs owned by others*; *Maintenance & repair*; *Transport*; *Travel*; *Construction*; *Insurance & pension*; *Financial*; *Charges for the use of intellectual property*; *Telecommunication*, *computer & information*; *Other business*; *Personal, cultural & recreational*; and *Government services* and around 60 detailed services commodities.

Ranking of goods and services

See **Appendix E**.

Composition of merchandise trade reports

The composition of merchandise trade reports (**Sections 6 and 7** in this publication) produce a summary of Australia's trade with a particular country or region. The reports show export and import data and are designed to provide a summary where major items are shown in more detail (SITC 3-digit level) while items of minor trade for that country are aggregated at a broader level (SITC 2- or 1-digit).

For the latest reference year, the threshold for major exports is 5 per cent of total exports and for imports it is 7 per cent of total imports.

For example, if one chemical item (in SITC section 5) was picked up as a major export/import for a report and the rest did not individually meet the criteria—but were large in aggregate—they would be reported as “5* Other chemicals” with the single individual major item shown separately (e.g. “515 *Organo-inorganic compounds*”). The “*” in the “5*” signifies that the data is an aggregation of all SITC items in section 5 that have not been reported separately.

Valuation

Merchandise trade

Exports: Valued at the *free-on-board* (f.o.b.) basis at the Australian port-of-shipment. Charges for distributive services provided beyond the customs frontier are not included (e.g. international freight and insurance charges).

Imports: Valued at the *Australian Customs Value* for Australian data. This is based on the price actually paid, provided the buyer and seller are independent, on a f.o.b. basis, i.e. charges and expenses involved in delivering the goods from the place of exportation to Australia are excluded.

Services trade

Services statistics are based on market price for both credit (export) and debit (import) entries. This is in accordance with the latest international standards determined by the International Monetary Fund and published in the BPM6.

Country

Data for a particular country or group are given on a basis consistent with the composition as at the end of the reference period for this publication (in this issue, December 2011).

For exports, ‘country’ refers to the final destination as reported by exporters. It is understood, however, that exporters may not know the country of final destination of their goods at the time they are shipped. This applies particularly to goods directed through entrepôts such as Singapore, Hong Kong (SAR of China), and major European ports, with a consequent overstating of Australia's exports to these countries and corresponding understatement of exports to countries ‘down stream’ from them. For imports, ‘country’ refers to the country of origin of the goods, which is defined as the country of production for Customs purposes.

The geographic country groups are based on the ABS Standard Australian Classification of Countries (SACC), 2011 (ABS [catalogue 1269.0](#)), with a few minor exceptions. Turkey is included in Europe not the Middle East as recommended in the SACC, Bermuda is included in the Caribbean not North America. These exceptions allow goods and services data to be added together on a consistent basis.

Country groups are detailed in **Appendix B**.

Merchandise trade

Although not members of APEC, Puerto Rico and the US Virgin Islands have been included in the APEC United States' total as they are regarded by the United States as part of its customs zone. When the United States reports its total exports it includes exports from these two self-governing territories. This change was made to make Australian and United States data more consistent.

Services trade

For the European Union services data from 2005 to 2007 includes data for the European Union 25 and from July 2007 onwards includes data for the European Union 27.

The OECD includes Chile from March 2010, Israel and Slovenia from July 2010 and Estonia from October 2010.

ABS Chain volume measures

To enable analysis of the movements of goods and services in 'real' terms, estimates of chain volume measures are presented in Table 1 in this publication.

Estimates of 'real' growth are compiled by the ABS, using chain volume measures. Chain volume measures are derived by deflating the original current price series by specifically compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated into the publication. The reference year is updated with the completion of estimates for each financial year.

Prior to the reference year, chain volume measures are not additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For further information on chain volume measures refer to the ABS publication: *Information paper, Australian National Accounts, Introduction of Chain Volume and Price Indexes* ([catalogue 5248.0](#)).

Implicit price deflator (IPD)

The IPDs used in this publication are derived by dividing current price series by the corresponding chain volume measure.

Terms of trade

In this publication the terms of trade are based on the ABS definition. They are measured using the following index:

IPD for the export (credit) item divided by the IPD for the import (debit) item, multiplied by 100.

Trend growth rates

Trend growth is derived by log-linear regression using the least squares method. It is a more robust measure than the 'average' annual growth rate as it takes account of all observations and, as such, is less likely to be affected by the end points of a given period.

Total trade

Total trade is the sum of exports and imports. This is a useful measurement of the overall trading relationship between Australia and its trading partners. Total trade data is useful in ranking Australia's major trading partners, without a bias towards ranking only the larger export markets, or the larger import sources.

This publication was compiled mainly by Julie-Anne Andrew, Neil Batty and Frank Bingham.

If you want to know more about these statistics or about other trade and economic publications produced by DFAT, please email statssection@dfat.gov.au.

If you want to know more about the Aircraft; Resources or Coal & iron ore papers please contact Frank Bingham on telephone (02) 6261 2271, facsimile (02) 6261 3321, or by email to statssection@dfat.gov.au.

Appendix D

Confidential exports

The system used by the ABS for confidentialising foreign trade statistics is designed to maximise the release of data, without divulging details of any single firm's operations. A complex range of confidentiality provisions are applied to the data. Those of most relevance in this publication are:

- A. No details** No data for a particular commodity item is separately released. For example, the total value of non-industrial diamonds exports is only included in the confidential item dump code of 988 for all countries and world total.
- B. No country details** Total exports of a particular commodity are available, but not for individual countries. For example, the value of liquefied natural gas exports to each country is suppressed, but the world total is available.
- C. Selected country details** Exports of a particular commodity to some countries are suppressed, but the value of exports to other countries, and the world total is available.

The following table lists details of confidential commodity items that can be identified separately in the SITCr4 classification:

SITC Code	Description	Restriction Type	Period
034.28	Other frozen fish (specifically tooth fish)	A,B	from Oct 2003
042	Rice (selected varieties)	A,B	various
043	Unmilled barley	B	latest 6 months only
045.2	Unmilled oats	B	from Jul 1993
048.3	Macaroni, spaghetti and similar products (specifically uncooked pasta)	A,B	from Oct 2008
057.79	Edible nuts nes (specifically macadamia nuts)	A,B	from Mar 2000
061.11	Sugar (raw cane)	A	available on a quarterly basis after a 6 month lag
081.13	Lupins (incl feed for animals during a voyage)	A	latest 6 months only
098.91	Pasta cooked or stuffed; couscous (specifically couscous)	A	from Oct 2008
112.3	Beer made from malt	A,B	various
273.31	Silica and quartz sands	B	from Jul 1999
278.3	Salt	A	from Mar 2008
284.21	Nickel mattes	A	from Jul 1988
285.2	Alumina (aluminium oxide)	B*	from Jul 1988
286.1	Uranium ores	A#	from Aug 2009
286.2	Thorium ores	A#	from Nov 2002
287.83	Titanium ores and concentrates (eg rutile)	A#	quantity data released on a 6 month basis
287.84	Zirconium ores and concentrates	A#	various
287.99	Base metal ores and concentrates nes	A#	from Jul 2000
288.10	Slag, ash and residues (specifically tantalum glass)	A#	from Jan 2002
292.94	Vegetable saps and extracts	A	from Sep 2002
321.21	Bituminous coal, not agglomerated (specifically semi coking coal)	C	various
335.21	Tar distilled from coal, lignite or peat	A	from Oct 2011
335.25	Oils and other products (specifically Naphthalene)	A	from Mar 2003
343.1	Liquefied natural gas	B	from Aug 1995

SITC Code	Description	Restriction Type	Period
421.21	Crude cotton seed oil	A	from Oct 1988
421.29	Cotton-seed oil & its fractions	A	from Jul 2011
511.22	Benzene, chemically or commercially pure	A	from Feb 2011 ⁹
511.25	Styrene	A	from Oct 1999
522.1	Carbon (incl black carbon), nes	A	from Jan 2006
522.67	Artificial corundum	A	from Feb 2002
523.64	Sodium triphosphate (sodium tripolyphosphate)	A	from Mar 2002
523.72	Neutral sodium carbonate (disodium carbonate)	A,B	from Mar 1992
523.73	Sodium hydrogen carbonate (sodium bicarbonate)	A,B	from Mar 1992
523.81	Cyanides (specifically Sodium cyanide)	A	from Sep 2002
524.94	Carbides (specifically Silicon carbide)	A	from Jul 1999
541.41	Alkaloids of opium	A	from Jul 1991
541.49	Other vegetable alkaloids (specifically Vegetable alkaloids, salts, ethers, esters & other derivatives)	A	from Jul 2004
541.99	Other pharmaceutical goods (specifically Sterile surgical sutures)	A	from Feb 2004
571.11	Polyethylene	A	from Nov 1992
572.19	Polystyrene (non-expansible)	A,C(Feb-11)	from Jan 1988
574.33	Polyethylene terephthalate	A	from Feb 2003
598.64	Activated carbon	B	from May 2006
634.54	Medium density fibreboard	B	from Nov 1988
667.12	Unworked cultured pearls	B	from May 1995
667.22	Sorted diamonds, non-industrial	A	available on a quarterly basis after a 6 month lag
671.21	Non-alloyed pig iron	A	from Feb 2009
671.41	Ferro-manganese (containing by weight 2% carbon)	A	from Aug 1999
671.52	Ferro-silico-manganese	A	from Aug 1999
672.62	Semi-finished prod. of iron/non-alloy steel	A	from Sep 2000
673	Flat-rolled products of iron/non-alloyed steel not clad, plated or coated (specific thickness only)	A	from Sep 2000
674	Flat-rolled products of iron/non-alloyed steel clad, plated or coated (specific thickness only)	A	from Aug 2000
683.1	Nickel and nickel alloys, unwrought	A	from Feb 2003
683.23	Nickel powders and flakes	A	from Feb 2003
691.51	Sanitary ware of iron or steel (specifically sinks and wash basins)	A	from Dec 2002
721.21	Mowers for lawn (specifically 4 stroke mowers)	B	from Dec 2009
723.21	Front end shovel loaders	A	from Jan 2003
741.82	Non-gas instantaneous water heaters	A	from Feb 1998
764.32	Transmission apparatus incorporating reception apparatus (specifically base stations for radio)	A,B	from Jul 2007
771.23	Ballast for discharge lamps or tubes	A	from Feb 2007
793	Ships boats and floating structures (specifically cruise ships and similar vessels designed to transport persons and motor boats)	A	from Feb 2004
851.15	Footwear non-water proof (specifically metal toe cap)	A,B	from Apr 2009
851.48	Footwear nes	A,C(Feb-11)	from Jan 2007

* Special case. See "Confidentiality" section in Explanatory Notes. # Broad values for these commodities are published in SITC 280 – Confidential minerals ores.

For more details on the confidentiality of foreign trade statistics, please see the Australian Bureau of Statistics website at <http://www.abs.gov.au> under Themes – International Trade – Confidentiality.

Appendix E

Goods and services rankings

Commodity rankings

The ranking of Australia's top exports and imports is usually based on merchandise (goods) trade only. DFAT ranks merchandise trade using the United Nations *Standard International Trade Classification Rev4* (SITC). SITC is a hierarchical trade commodity classification with five different levels, with the 5-digit codes aggregating to the 4-digit level and so on to the 1-digit level. SITC does not include services.

When ranking merchandise exports and imports, DFAT uses SITC at the 3-digit level (approximately 260 codes). At this level, all Australia's goods exports are easily identifiable with meaningful descriptions, i.e. *Coal, Iron ore, Gold, Crude petroleum, Beef, Wheat, Alumina, Aluminium, Natural gas, Passenger cars* etc.

To measure the contribution of services activities to exports and imports, the SITC classification was combined with the ABS Extended Balance of Payments (EBOP) services classification to derive Australia's top 25 exports and imports. The ABS EBOP services classification is based on the United Nations publication *Manual on Statistics of International Trade in Services* (MSITS) and the International Monetary Fund's (IMF) sixth edition of the *Balance of Payments Manual* (BPM6).

Services classified by EBOP were integrated into the SITC 3-digit merchandise rankings at the 1-digit level covering 12 broad services activities with the exception of:

- *Transport, Travel and Other business services*. As these three codes accounted for more than 80 per cent of Australia's total services exports and imports, so activities at the 2-digit EBOP level were used to provide more detail on the types of services traded in these broad categories; and
- For *Personal travel services* only, the 3-digit EBOP level was used to separate out *Education-related travel services* and *Other personal travel services* – Australia's two largest services exports activities.

Using this method, Australia's top 25 exports and imports of goods and services are shown in Tables 2 and 3 in this publication.

In addition to the rankings DFAT has also included two analytical industry series in these tables covering trade by the Education and Tourism industries.

Education includes the following EBOP codes – *Education-related-travel services* (EBOP 4.2.1), *Royalties on education services* (EBOP code 8.5.1) and *Other education services* (EBOP code 11.2.2).

Tourism is based on the ABS Tourism Satellite Account (TSA):

- The TSA measures the consumption of goods and services by the tourism industry, with an aim to measure the direct contribution to the Australian economy of the tourism industry. The TSA defines tourism consumption to include all travellers who stay in the host economy for less than one year, regardless of their purpose for travel (such as business, education, health and recreational purposes). As such the TSA definition of exports and imports of tourism is much broader than the general understanding of tourism services (i.e. covering just recreational travellers).
- The TSA definition includes all or part of the following services activities from the EBOP trade in services classification: *Passenger air and Sea transportation services* and *Related agency fees & commissions; Travel services* (including *Business travel, Education-related travel* and *Other personal travel*) as well as imputed services which are not measured in the EBOP classification, such as goods provided to visitors in private households; and
- The TSA data is only available on a financial year basis. For more information on the TSA please refer to the ABS publication *Tourism Satellite Accounts* (catalogue 5249.0).

Users should not include these two analytical series in the goods and services rankings as they would **double count** particular EBOP services items. For example to include *Tourism* into the rankings without adjusting other EBOP items would double count all or part of *Business, Education, Other personal travel services* and *Passenger transport services*.

Country rankings

DFAT estimates total trade in goods and services on a regional basis by adding goods (merchandise) data on a recorded trade basis with services data on a BOP basis. DFAT has been producing these estimates since the ABS ceased publishing its regional BOP publication in 1999-2000 (this publication contained regional goods and services both on a consistent BOP basis).

As DFAT cannot convert merchandise trade data to a BOP basis to be consistent with ABS published services data, DFAT's current methodology to produce regional goods and services estimates has a number of issues that users should be aware of:

- *Net exports of goods under merchanting* will not be included in DFAT's regional goods and services statistics as it is not included in ABS merchandise trade statistics. This export was valued at \$163 million in 2011;
- Imports of *Goods procured in port by carriers* will not be included in DFAT's regional goods and services statistics as it is not included in ABS merchandise trade statistics. This import was valued at \$1.9 billion in 2011; and
- Exports and imports of *Goods for processing* includes the gross value of the good as reported in ABS merchandise trade statistics, but also double counts the processing fee recorded in ABS services trade statistics under *Manufactured services on physical inputs owned by others*. The processing fee was valued at \$26 million for exports and \$1 million for imports in 2011.

DFAT has analysed the impact of these issues on its regional estimates (for 2008-09) and has found that they are relatively insignificant. For exports only one country (the United States) was out by more than 1 per cent. For imports only six countries are impacted by more than 1 per cent, with the exception of imports from Hong Kong (which was out by plus 15 per cent, mainly due to imports of *Goods procured in port*).
