Concerns
Disadvantaged young people were more likely to be extremely/very concerned about:

- Financial security: Twice the proportion of economically disadvantaged young people reported they were living with a disability. The proportion was 27% compared with 16%.
- Family conflict: 25% compared with 17%.
- Discrimination: 16% compared with 10%.
- Domestic/family violence: 14% compared with 9%.

Disadvantaged young people were:
- Less confident in their ability to achieve their post-school goals (43% compared with 49%).
- More likely to perceive barriers to finding work (52% compared with 38%).
- Less likely to feel positive about the future (51% compared with 63%).

Nearly 1 in 5 (19%) disadvantaged young people felt they did not have someone they could turn to if they were in trouble or a crisis.

Almost double the proportion of economically disadvantaged young people felt very sad/sad with life as a whole (19% compared with 9%).

A Youth Survey report on economically disadvantaged young people.
